

TOBIAS WONG

WEB DEVELOPER

2499791482 | wangliuliu241@gmail.com | Canada

SUMMARY

Detail-oriented and collaborative front-end developer with strong proficiency in Vue.js, JavaScript, and Python. Experienced in building responsive, interactive web applications and integrating front-end components with back-end systems. Eager to contribute to a dynamic development team to create high-quality user experiences while leveraging a strong foundation in UI/UX design and version control.

TECHNICAL SKILLS

Front-end: JavaScript (ES6+), HTML5, CSS3, Vue.js, React, Next.js

Back-end: REST API integration, Python, Django

Databases: PostgreSQL, MySQL

Tools: VS Code, Jupyter Notebook, Git, Nginx, Docker

WORK EXPERIENCE

Volunteer Software Developer, KLHIISA

July 2025 - Present | Remote (Canada)

- Collaborated as a full-stack volunteer developer on a community job portal project.
- Developed and maintained frontend and backend features using Next.js, React, Django REST Framework, and PostgreSQL.
- Implemented authentication, job posting, and content management features.
- Deployed the platform in a Dockerized production environment with Nginx and Gunicorn.

Web developer, ZHONGNONGYUN TECHNOLOGY CO., LTD.

July 2021 - Aug 2023

- Collaborated with designers and back-end developers to build responsive and interactive web applications using Vue2 and Vue3.
- Developed high-quality, maintainable code using HTML5, CSS3, and JavaScript (ES6+), incorporating Vue Composition API.
- Integrated front-end interfaces with RESTful APIs and back-end services, ensuring data communication.
- Conducted cross-browser and device testing, identifying and debugging issues to optimize performance.

PROJECT EXPERIENCE

Job Platform Frontend | KLHIISA

July 2025 - Sept 2025 | Remote (Canada)

Tech Stack: Next.js 15, React 19, TypeScript, RESTful API

Link: <https://job.klhiisa.org/>

- Developed a responsive job platform supporting job search, filtering, posting, and management.
- Integrated RESTful APIs for authentication, permissions, and data synchronization.
- Built custom Hooks (useJobs, useJobSearch) for state management and optimized data fetching.
- Implemented search caching and error handling to enhance user experience.
- Ensured code scalability and maintainability with TypeScript and modular architecture.

Key Results:

- Delivered high-performance, mobile-friendly UI with smooth user interactions.
- Reduced API load with frontend caching and efficient rendering.

EDUCATION

Master of Computational Science

Sept 2024 - Aug 2025

Laurentian University – Sudbury, ON

Bachelor of Computer Science

Sept 2018 - July 2022

University of Jinan

ADDITIONAL INFORMATION

- **Languages:** English, Mandarin.
- **Certifications:** Artificial Intelligence for Cybersecurity (Coursera Certificate).
- **Awards/Activities:** Second Class Scholarship, Third award of Qilu Software Design Competition
